

## Artist Statement

The Phase 8 Project is a body of my work revolving around my family, which I started in 2007 and ended in 2021/2022.

The images revolve around three houses: my parents' house in Phase 5, my own house in Phase 8, and my mother-in-law's apartment in Creek Vista.

It is my closure to the death of both my parents and, in a way, also a closure to my stay in Karachi.

It is an insight into the transience associated with time, with an effective dramatic force of facticity.
